Project Name: "Cloud Computing Based Forensic Analysis Of Mobile Application using Data Mining"
Programming Language –java framework Java spring framework

Database :Mysql
INSTALLATION: Eclipse, SAAF, ASEF Android Virtual Device,My SQL
ABSTRACT:With the explosive increase in mobile apps, more and more threats migrate from traditional PC client to mobile device. Compared with traditional Win+Intel alliance in PC, Android+ARM alliance dominates in Mobile Internet, the apps replace the PC client software as the major target of malicious usage. In the implementation, we adopt Android Security Evaluation Framework (ASEF) and Static Android Analysis Framework (SAAF), the two representative dynamic and static analysis methods, to evaluate the Android apps and estimate the total time needed to evaluate all the apps stored in one mobile app market
