ESSAY WRITING.My First Day in Coesit.

The day had come to finally start fresh with something new in my life. As everybody goes to college, which I have always heard and seen.

College is such a word that brings a person into a complete different mood. It's about freedom, making new friends and of course learning and educating yourself to be successful ahead of this.

Well, talking about my personal experience on Day 1. Okay, Now that I got admitted to Coesit, my first thought was, how will I manage studying in India since I have been studying abroad for this long. The people that I will meet here, the teachers that will teach me and about the entire atmosphere.

Alright, I woke up early in the morning, got ready and packed the rest of my stuff, I usually skip breakfast but, this time I literally ate, before I left for college.

I missed my 1st lecture, bell rang, I soon entered the class and continued with the 2nd period. The little bit of fear was turned off along with my nervousness.

I was wondering about who should I really approach first to make friends with, or even to have a little bit of interaction.

Taking notes is another headache since I joined. Almost around 4 days later.

The 2nd period went confusing a little

bit, I somehow managed.  
After the 3<sup>rd</sup> period got over someone asked me to come along with them to ma'am, so that she can provide us with our respective Roll numbers. Well, I was given mine and she got hers; we sat together for a bit and had a little introductory conversation with each other, it was pleasant and somewhat better than I thought.

Things at the starting are always awkward and new to us, but we learn to put things right.  
The teaching was really good and the thing that was bugging me was, "do I really have to copy these many notes?". But, it was really nothing as such a big deal.

The weather was really good and I felt energetic. Talked to few other classmates and it was almost 12 pm that's the time when we get dispersed & leave for home.

My first day was quite amazing, when we expect things and we can't really meet those expectations, then something feels empty.

But, when we open our minds and take what is coming our way with very little expectations, we feel the vice of contentment and happiness. I would like to conclude my essay by saying that, school life is amazing and we sure want to go back

and live those memories again. But college is on the whole, other spectrum.

It comes with failures and success and a little bit of more seriousness.

## MY FIRST DAY IN COCSIT

As it happens with everyone unexpectedly, it happened with me too. I had never ever expected that I would get such a great opportunity to study in such a great college COCSIT.

Before entering this college, I had heard many bad things about this college like the teaching staff members here are not well at their teaching, the students of this college don't come here to study, they just come here for timepass and so on. But my first day of college was really amazing and studying here is such a great fortune for me. On the first day itself I was surprised by the way of teaching of the staff members. They not only gave us knowledge of our subjects but also thought us good manners, how to deal in society, communication skill and they also guide us for our further future.

I really loved this college and the teachers who teach us. The teaching staff not only focuses on teaching us our subjects but also they give individual attention on each student in per practices as well as in class. They guided us when we made some mistake in a very polite manner. I just loved their teaching and the way they guide us for our future. This college also organises guest lectures for our proper guidance. My first day in COCSIT was really amazing and this is the day which I will never forget in my life.

Studying in such college is pleasure for me. It is like life-time achievement for me. Practicles are really fun time for us because it is the time for us to study new things that we had never experien- ced in our past life. I didn't expected that this college will give any importance to nature but they utilized the open space in planting plants which gave a very beautiful touch to the college. This college also gave very much impor- tance to cleanliness. They maintain the college in such a good way that it is worth studying here.

I thank my parents that they gave me such a great opportunity to study in this highly skilled college. COCSIT and I also thank the staff to share their knowledge with us.

## Essay

### # My First Day in 'COCSIT' #

We have got a beautiful life which is gifted by god. We have to make it more Fantastic so we can be... For that we need to take education. I have seen many ups & downs in my life. In my education life, I am studying in 'COCSIT' college for graduation. As we know that, "शाक हे देवाचे मंदिर आहे." so we have to keep it like as God's house. In the same temple, I would like to share some moments of my first day in COCSIT.

After completion of my 12<sup>th</sup>, I have taken the admission in COCSIT college for further studies. When I entered in the college for first time, it was fear in my mind that what will happen and all that... But, it was the memorial day in my life. I got so many friends in the college. Also the teachers are very good in teaching as well as they can understand the students. When I was entered in college on first day my heart get filled with the joy & happiness. One thing I would like to mention here that, the good motivational thoughts written on each and every wall of our college is truly amazing, one of them is.

"If you can imagine, you can achieve it,  
but, if you can dream it, you can become it...!!!"

I would like to share one moment of this amazing college is when I entered in the college. Firstly I met to the More Sir, so that he had motivated me a lot & told the importance

of education. They said that "Education is the third eye of human." And yes, it is true. On the first day each teacher had introduced themselves & told about our faculty. All the teachers of this college are very nice that they can solve every problem of the students. I think this college is an opportunity to prove ourselves that "I can and we can". Generally, we think that in college there is no discipline but I would like to say, discipline starts from here. College gives us everything i.e. opportunities and a stage. So we have to also give them the good feedback.

At the end I would like to say "The memories it are temporary but the events are permanent". As like it the first day of my college will be an event forever. I must say that the first day is a fabulous and marvellous event of my life. And I hope my last day in the CCSIT college would be as like first day. I will always remember that day of my life from my bottom of my heart. But, sadly as the time passes, it no remains forever the days are going on in this college. And I feel so lucky to have such college which will must provide us a bright future. I will always remember that day of my beautiful college. Days are passes but the memories still remain...

## MY FIRST DAY IN COCSIT

'My FIRST DAY IN COCSIT' by hearing First day of college it's obvious that everyone felt is nervous. I was also suffering from this nervousness. One day before this day I was little bit nervous, that who will be the college, students, teacher and all. The Next day I came. My dad dropped me in the college and he went by saying, "All the best and enjoy your first day". When I entered there was still little nervousness inside me. Everything was new for me and <sup>for</sup> everyone also. When I entered in the campus two teachers sitting on chair and that time I was not wearing the uniform so they called me and asked "why you are not wearing uniform and all". That time I was scared because I was not knowing anything and even I was not knowing that teachers afterwards they explained me very nicely and I started walking when I reached to the main entrance it was bit confusing because there were two entrances one was for boys and one for girls. That time I was not knowing which one is for girls I waited there for 2-3 mins and then one ~~tee~~ of my friend she came

and asked if I am having any problem that time I felt relief and ~~at~~ later on she solved my problem and I walked with her after that we started to talk and I got that even she is ~~doing~~ <sup>studying</sup> the same thing that I was. She was my classmate, she ~~help~~ her name was Jahnvi that day I sat with her and we both first started to introduce ourselves after sometime I adjusted in the class and because of her only I was able to adjust myself in the class. She made me comfortable.

My nervousness and fear was reducing as the time was going. After sometime the bell rang and ~~the~~ the announcement was given for the national anthem to stand in attention position. We all stand in attention position and sang the national anthem. After 5 mins the lecturer came she was our ~~class~~ Introduction to biotechnology teacher. On that day our chemistry teacher was absent so she took that lecture and it was quite interesting as the time was passing I was comfortable in class. ~~The~~ I was introducing to myself to everyone. Even all my friends made me comfortable with them.

This way my day first day of COCSIT passed. ~~The~~ The college was interesting. I enjoyed a lot and the fear and nervousness was also gone after sometime I was like what is nervousness. Now the college staff and my friends are ~~like~~ <sup>familiar</sup> family to me.

## MY FIRST LECTURE IN COCSIT

I am Manoj swami. I passed H.S.C exam with 79% and the medical entrance exam NEET with 438 marks. I had sufficient confidence about MBBS admission. But this didn't happen.

I couldn't get admission for MBBS. Then I took admission in COCSIT college for Biotech branch.

Already, college has been began, so all new students were settled in college. But, I am new for everyone. How I will adjust, what will happens in college. I have such tremendous queries whose answers aren't know to me.

'7th Aug. 2017' my first day in COCSIT.

'8:00 am' my first lecture in COCSIT. I am very cool boy as a MS Dhoni, but I feared about very first lecture. "Who will be the professor?, How will teach?, can I manage with this environment?", such various questions were arising in my mind. I couldn't understand, what could I do? The A ring belled at 8:00am.

I entered in classroom. All guys & girls were stood up. I couldn't understand, why all students stood up? But, I hear a large sound and then I got idea. These all were had stood up for the India's national anthem 'Jan - gan - Man'. I loved this because I am very proud Indian, I love my country very much. I sang a national anthem with my brothers

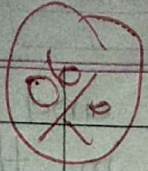

and sisters very proudly and with honour. There are very few colleges doing this activity. Therefore ~~the~~ respect for co-sit ~~is~~ increased from bottom of my heart. Before this I didn't know about co-sit very much. My sister completed degree from this college. so, I know very little information about co-sit.

The first professor entered in a class as soon as national anthem get completed. He took a presenty. I were new, so I didn't have roll no<sup>at</sup> that time. I told my name to sir for attendance. But sir were very strict, he give me reply, "This is not problem." In first 5 minutes of my first lecture I got this. so, I were more feared about complete lecture. sir started to teach his subject fundamentals of chemistry. I knew all chemistry upto 12th very finely, so I easiley understood this subject. sir were asking questions to boys when they were teaching. No any boy had answers of questions. girls were giving very fine answers. so that's why I were feeling jealousy. ~~latter~~ Next time <sup>when</sup> sir asked question I gave answer very quickly and in this way I impressed sir. sir were appreciating me. At that time I feeled a good. In this way my first lecture ~~was~~ very nice for me.

- My first day in the Cocsit -

Our collage was started on 1st July and I take admission on that day. First time I entered on 5<sup>th</sup> July after entering in the campus I find that there are two persons who were sitting on the chair and they were teaching us that when we entered in then we have to say 'good morning'. I am so happy because in whole life I never experienced such new things and this is the turning point for me. I had changed my opinion on that day that Cocsit is the institute in which I can fulfil my dreams and achieve something.

We entered in the class we (are) very nervous at that time (and) (then) the lecturer of chemistry entered in our class. In our collage, we thought that first day everyone ask our previous percentage but it is surprising (noone) ask anything only names. I understood that they <sup>were not</sup> comparing us with our previous marks. Sir, removed all the misunderstandings from our mind and make us fresh they said that its time to change don't see in past and said a thought. "you cannot change your future but you can change your habits and surely your habits will change your future." of Dr. APJ Abdul Kalam

From this though I get inspired and sir said that "you have the sky & in the biotechnology to fly."

On that day we realize that we had lost something but we have more to do in life. After that micro biology madam entered we teach from them the lessons for leaving simple life. After that English teacher entered they teach us that it is our function at class, we have to participate in various activities and it is the one or platform to build our confidence. On first day, we were waiting for the recess because we want to talk and introduce to our friends who were in our previous collage.

After the recess, we thought that in our previous collage there are so many restrictions on us but in this collage we I found new things. Then Madam said that you are now degree students and said that no one will punish you or insulting you. Then I was relaxed and in this way everyone teacher is being friendly with us. Our principal said that if you want to improve your English then you must speak in English while entering the campus.

In our collage on first day everyone in staff member tries their best to feel us comfortable and confident and tried to involve us and welcome us in 'COCSIT'.

## My First Day in the COCSIT

My collage COCSIT i.e Collage of computer science and Information technology. Specially this collage known for the courses of Researches, biotechnology field, computer science and many other courses. Our principle Sir Mr. Gulpe sir, Director MR. Patil sir and all the teachers from the depth of my heart I really thanks to all these persons.

First time in the collage I was very afraid of all things like how the collage would be the atmosphere or rather, how the staff would be and most memorial thing how the study teaching will be there in the collage. As the day passed i am very familiarize with the collage teachers and friends who helps me always in the study. Our collage is one and only which conducts lectures and practicals properly and as well as

There is a thought that every one knows "There is nothing impossible when impossible itself says I am possible" my first success in the college life is that I have taken admission in a most popular collage. As collage conducts all the different types of activities, I am impressed to know this about speech, essays, writing competitions. And one more thing the day when third year students have arranged a welcome party for us this day I will never, never, never, forget in my life. I was a braid of teaching specially english & grammer and communication barriers but my favourite sir Sameer had explained and make me understand about the communication barriers very neatly.

Practicals as well as seeing the microbial things under microscope I love this things and COCSIT collage is giving me a lot of things for my success. I am very thankful to all the lecturers and sir from my depth of the heart.

principle of the

We can say that a good habits  
can make the change in  
life and that I have  
got from COCSIT.
