|---|--|--|
| 5 | <p>Pooja Gundare</p> <p>Respected sir,</p> <p>I am Anil, living in sector 40, beside my home there is construction work of building is going on from past three years. for construction there is use of water , but more of this, wastage is there , That is causing storage of water: leading growth of mosquitoes and causing health problems, and thus creating unhygienic conditions. the noise created by the construction disturbing the patients of hospital that is near by the place..</p> <p>first I tried to discuss this problem with the workers bud they are not paying any attention and behaving rudely. so I ended up writing to you , sir please help me regarding this. i hope you will look after this and take immediate actions as early as possible.</p> <p>Thank you.</p> | |
| 6 | <p>Jarif Sayyad</p> <p>Respected Sir,</p> <p>My name is Anil Kumar there is an construction work is going besides my home. Construction is going from very long time, also there is lot of water usage and there are many workers are there who are very unhygienic due to which mosquitoes are increases in large amount. I told them about the problem but they behave very badly.</p> <p>Please Sir i request you to take action immediatly.</p> <p>Thank You.</p> <p>Regards, Anil Kumar.</p> | |
| 7 | <p>Aishwarya Gaikwad</p> <p>Respected sir,</p> <p>Sir i am 'Anil kumar ' i write letter to munciple commissioner. There is a one construction work going on beside my home due to large work creating nuisance so sir i am feeling very uncomfert due to this nuisance i can not work well due to nuisance and i have headeack due to nuisance.</p> <p>so sir i hope you do something for my problem</p> <p>Thankive anil kumar</p> | |
| 8 | <p>Pranit Ramgiri</p> <p>Respected sir,</p> <p>I would like to draw your attention to the matter of the construction work going beside our place. It had been near about three years the construction is going on, and due to which there is tremendous water usage and also water wastage due to which we are faeing water crisis. Due to the irregular construction there is unhygienic atmosphere full of mosquitoes and the behavior of the workers here is very bad and vulgar.</p> <p>I request you to take immediate action regarding this matter.</p> <p>Regards Anil Kumar.</p> | |
| 9 | <p>Abhishek Somuse</p> <p>Respected sir, myself Anil Kumar and i live in the Gokul society and i would like to tell you that our contruction disturbing our society there are the in our are the lack of water but you dont think about the water please see it well.there are for long time for the 3 years for the construction and it has a very mosquitoes for the society.</p> | |

| | | |
|----|--|--|
| | if you said to your workers,then it will helpful for us to do less noise as well. your constrection workers are the bad in the manners so please tell them right way please sir.please take a action agenst him and please help us in that situation. | |
| 10 | Avdhut Patil | |
| | Mr. Ashok, municipal commissioner respected sir i am anil kumar. i am from sai nagar from latur. beside my place threr construction are going for long time since three years. and they waste large quantity. of water. as well as they create nuisance every day so thats why they increases pollution day by day, so sir i am requested u please take action immediatly. | |

INDIA:A software superpower.

22

In this developing era of growing technology there have been a tremendous change over in various countries, especially India.

Near about 10 years back India was counted in the list of poor technology countries, it's due to the growing need of the society that we should be independent in the matter of technologies and digital world. There were many revolutions which took place such as "Make in

India" concept of our prime minister and "Jio Digital life" which transformed India to the highly digital country.

At first, we were depending upon other countries for the technological helps and software issues but, now we are self dependent that we can make our own software's and applications. Now-a-days softwares have become part and parecel of our life. Every organization and every super markert store has there own software application which provides an ease of access to the customers. In India the software development is on next level, every year India produces various softwares and aplications, softwares doesn't only provide easy access to the customers but, some softwares also provides technical support and cyber security and much more.

There are also various online learning courses which we can complete by sitting at home with a system with net connection, it is only because that the specific organizations have developed there softwares which we can access. There are also various online shopping softwares like 'flipkart.com', and we like to spend our free time on social media like FB, Instagram, whatsapp and many more these are all nothing but softwares, there are also negative point of view of using this softwares.

Its upto us how we use the specific software.

Thank you!

India has software super power.

Day today new technologys are created ane devoleped. so we need to update that technologys and that technologys are a part of software. so software is very important to every purpose and we are the student of software or IT we need to tech all type of edjucation about all softwares used in daily purpose.

We wan't to do some new inventions in all filed. today all the technical componees are use softwares like TURBOC, SQL, PHP, TURBOC++ these are the softwares are used to do programs .programs are the type of resource which provide the basic thinks to perform a task like store a data, database and so on. all industrys are use that softwares to do work fast and better than other industrys .

India has that power to do inventions in all software programing and make our nation strong in all technical fields. in india there are a colleges which provide an edjucation about how to developpe a software. so we need to take that edjucation and achive that for long term. by using software we can perform some task like communication with other country. we takes and give important data.

india build such a software enginears which are do there work outside the country but do that work for our nation. like RAW is an a government deuty which is fully depend on softwares.

we perform online services and that services are also use some softwares. today banking is basic need for all people to do there transactions quick and easily they use a software.

So software is the a super power in all sectors which are in daily use. so wee need to take that edjucation and make our nation strong.

GLOBAL WARMING

Global warming means increasing the average surface temperature of earth due to the increase of CO2 in atmosphere. why co2 increases co2 in atmosphere because of burning of large amount of foosile fuel as well as deforestation which increases the earth heat so thats why global warming increases day by day. co2 is a greenhouse gas which is only 1% is present . as comper to O2 and N2 , CO2 s % is very nigligeble. N2 & O2 are not green house gases. they are very benificiak for us .co2 utilization is very low and production co2 very high so thats why goble warming increases day by day.

every one talk about global warming but no one try to reduse global warming. now days its neccessary to reduse global warming otherwise temperature of earth increases very large and one day every living organisms will die due to the large quantity of greenhouse gas and high tempereatue.

what we can do for reduse global warming ? we can do large number of plantation and care about how they live long time. and one of most importatnt thing is that dont use private vehile for small distance journey. we can use public or goverment buses then and then only drecrease global warming. otherwise we all living organisms will die. these two things is suficient for reduse global warming.

India, a software superpower

India is said to be a software superpower by 2020, Currently Indian IT companies like TCS, Wipro and other have been emerging rapidly.

| | | |
|---|--|--|
| | <p>Even other countries have noticed its rapid growth and thus are investing vastly into Indian enterprises. Bangalore is known to be as silicon valley of India has also played a vital role in the development of IT sector.</p> <p>Multinational Companies like Microsoft, Adobe, Redhat are starting to expand in India as they anticipate India to be a software superpower. India has skilled software developers and IT professionals and are very much concerned about expanding their skills. Indian companies like TCS, Wipro or Tech Mahindra are also emerging outside India thanks to the reliability they offer. Chinese firms have also started to expand in India. India is ranking third in software development while China ranks second in hardware manufacturing. So, if they get together they can become world's most powerful in IT.</p> <p>If the growth of software companies grows in similar pace India may lead as a software superpower by 2020.</p> | |

| | <p>GLOBAL WARMING</p> <p>Today's world is the world of the industries, people are increase there population then they need of the product in many ways, they they don't think about the world. "Global warming means a increase in the greenhouse gases in the atmosphere", that is the our own environment. Just like CO₂ This is the Carbon Dioxide this gas comes from our generators and its very</p> | |

harmful for the global aspects. If you think about the world, the world think about you.

We all love our nation then we must try to keep green and clean it well, it starts from our home and its affect us. When industrial waste is too much then the effective particals affect our earth there are 4 following aspects is most important,

- 1) Earth Surface
- 2) Our envornment
- 3) Ozon Layer
- 4) Our modern life ETC.

Earth is Our mother then we try to live in the perfectfully. If you live totally depend upon the industry, you will pay fot it one day, and its true.No one can stop you yo avoid the uses of industrial products.

following are the what we all do for avoid the biggest problem on earth is the "Global Warmning".

- 1) try to use the government

vehicals

- 2) plant the trees

- 3) avoid the chemical

biofertilizers

- 4) our envornment keep clean

- 5) spread our good thinking that

is our possitive mind for the world.

If you keep a clear environment, then definately you will get good result in it. the greenhouse gases are like carbon dioxide, methene, and water vapours etc then it is very harmful for all the living organisms in this world and we have to fight for it.

India, a software superpower

Yes, India is becoming a software superpower. The year 1985 is the generator of software and IT revolution in India. Computers are spreading at a break neck speed all over the country. India can become software superpower of the world by 2020, but all depends on investment in workforce development and country level infrastructure.

The analytical skills of Indians are attracting many leading corporations to build research and development centers in India.

Today two types of IT organizations operating in India.

First the leading MNC's like IBM, Microsoft, Oracle(91% of patents are filed out of India by these MNC's) are making research centers and development centers in India.

The other group of IT like HCL, Wipro, TCS, INFOSYS(which are operated by Indians and Incorporated by Indians) providing software services to global customers. The IT hubs in India are Playing vital roles in software revolutions.

The main IT hub is at Banglore.

INDIA:a software superpower.

Now a days in an india Software developement process is mostly appreciating one.The computer is widely spreading all over the world with a fastest speed. So, the computer become a common commodity in every home.Not only a computer but also phone become a handset for the people.as phone there are many other disply showing commondity which are very popular among the society.Even a small child can handle the computer easily for playing games&also for surfing on internate.

These all easiness and fastest speed of work on acomputer is only and only beacuse of the easy handling and strong network providing software apps.The computer,software conciousness is being increasing now a days in our youngsters.So,this increases chances of the new innovation towards the development of powerful india.

So,this is the story behide a software superpower of the india. India is being recognised by all over the world community as a imerging powerhouse of a software.

and also they prove it by increasing a demands of a indian software apps, indian softwatre engineers.....etc.

The analytical thinking of the indiances are now attracting the many world's largest cooperation to open their research&development centers in india.

india shows their capabilities by developing supercomputer PARAM1000.but we all have a responsibility to narcture our yoth towads the software field.
thanks...

Global Warming

The danger is that global warming may become self sustainable ,if it has not cured early.- stephen Hawking.

the word golbal warming itself indicates the heating of globe/earth. green house is the small house in which plants are grown..the green glass panels of the house lets the sunlight energy to enter but do not allow to escape. thus causing heating the house..

same thing happens naturally, the gases such as carbon dioxide, methane, chloroflorocarbons, NO2, are presents over the surface of the eatth which lets the sunlight in the the atmosphere of earth but do not allow to escape causing heating of earth.

these gases are known as green house gases. and this effect is known as green house effect.

the main causes which are responsible for increasing these gases are

1) deforestation:- plants uses carbon dioxide for photosynthesis, due to cutting of trees there is reduction in absorbance of carbon dioxide by plants thus increase in Co2 level

2) More use of fossil fuel:- fuels like petrol, diesel when burnt release CO,CO2 causing increse

3) Refrigerators:- CFC is the gas mostly released from fridges causing warming as well as ozone layer depletion.

4) increasing populatioj:-leading to increase in urbanisation therefore leading to releasing these harmful greehouse gases from past century there is 0.6'c increase in earth's temperature. and in 2100 it will lead to increase by 2'c which will cause massive change - reports from world environmental organisation 2013 the effects of this warming of earth is abrupt odd climatic changes (El Nino effect), ozone layer depletion, melting of glacials caps (himalayan caps), causing increase in sea level and submerging many of coastal areas.

i always wonder why somebody do not do anything about GLOBAL WARMING and then I realised that I am 'somebody". yes only we human have to find remedies regarding this.

so what we can do: planting trees, reducing use of vehicles, slowing down the growth of human population..

so that we may become able to save the environment for our future and the next generation.

global warming is making us hot

instead lets make it cool....

INDIA IS A SOFTWARE SUPERPOWER:

software devlopment is required for beacoming our contry devloped.
India is one of the most devloped contry in past india is konwan for
thir hard work ,dedicated to contry but now days present situation
of india is india becomes as a software super power.

Software superpower are the App, App is use for user as medium of
computer,mobilesuch as any electronic device now days all pepole use
mobile mobile means it is the set of app,and app is called software

And we all know now due to our Government mens indian Government
india becomes 'Digital India' due to digital india Innovation of
more new app devloped so app used widely increses .
due to this incrising app we need new innovation.
