Assignment No 9

Q.1. Explain windows and operating in detail.

• windows :-

windows are graphical user interface which provide easy to way to access program and data on the computer.

which a particular pieces of software or data file may be viewed.

windows o.s developed by microsoft the company founded by bill gates.

window 1.0 was released in 1985, window 2.0, windows 2862.1 and 3862.1

window 3.0, window 3.1, windows 3.11, windows that consists of professional server, edit

and so on. windows ME (Million Edition)

windows xp (xperience) windows 2003 that consists of Interprize web, Edition and so

window vista

window 2007

window 2008

window 2010.

- windows are graphical user interface which provide easy to way to access program and data on the computer.

- which a particular pieces of software or data file may be viewed.

- windows o.s developed by microsoft the company founded by bill gates.

1. Desktop.

window that contain icons, menus, appl

Features such as My document, My computer, My network places, Recycle Bin, Internet explorer and so on.

My computer that contain diffⁿ drivers such as C, D, E, F you can save file and folder in any drive.

Recycle bin
Recycle bin stores deleted files, folder, graphics

My Network places
Network is connection betⁿ two or more computer for share resources. all resources in my network places such as files, folders, printer.

2. Explain the short note on Memory card.

A memory card or flash card is an electronic flash memory data storage device used for storing digital information.

These are commonly used in electronic device such as digital cameras, mobile phone, laptop computer, tablet, Mp3 player and video game consoles.

Video game consoles use memory card to hold saved game data.

Cartridge based system primarily use battery backed volatile RAM within each individual cartridge to hold saves for that game.

- Page No. _____
- The Neo Geo AFS released in 1990 by SNK was 1st video game consoles able to use memory card.
 - Memory card became common place when home consoles moved to read only optical disc.
 - For storing game programs, beginning with system such as TurboGrafx-CD and Sega-CD.
 - Storage capacity of memory card up to 512 GB.

13. Explain Network and their types in detail.

→ The connection between two or more computers for sharing information and resources is known as network. Resources such as file, folder, disk drive, and printer.

There are three different types of network are as follows:

↳ LAN (Local Area Network)

- LAN is a private network within a single building or campus that is used as up to few km length. They are used to connect personal computer and workstation.

Characteristics of LAN.

Their size

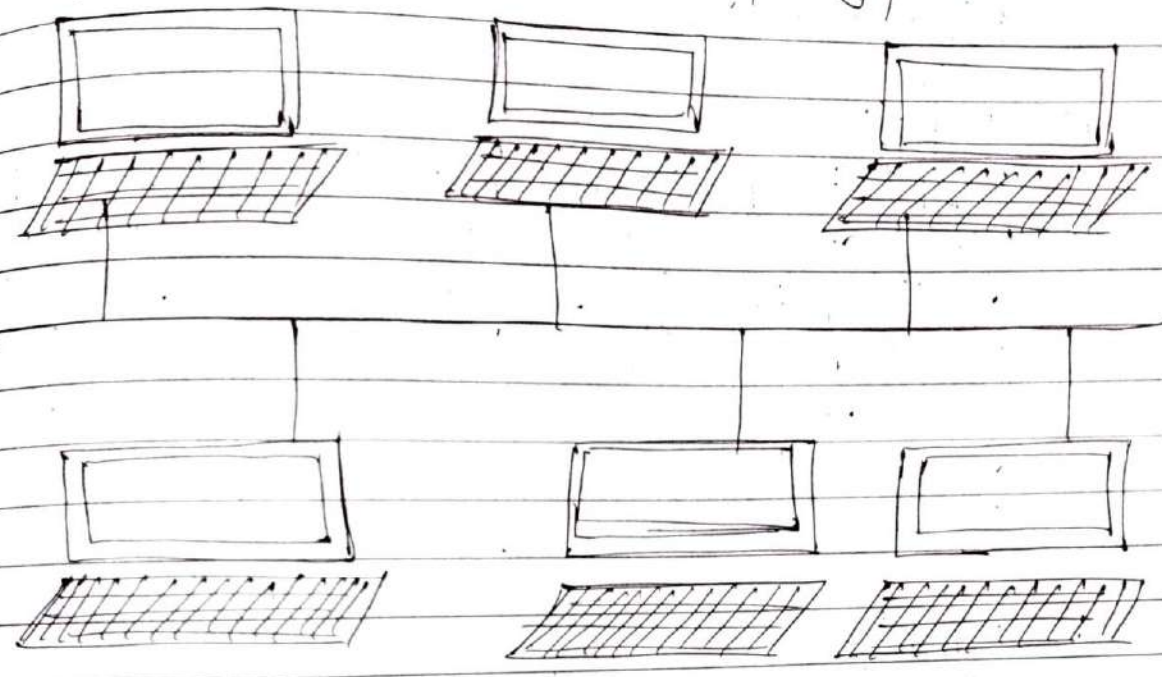

Their Transmission Technology

Their Topology

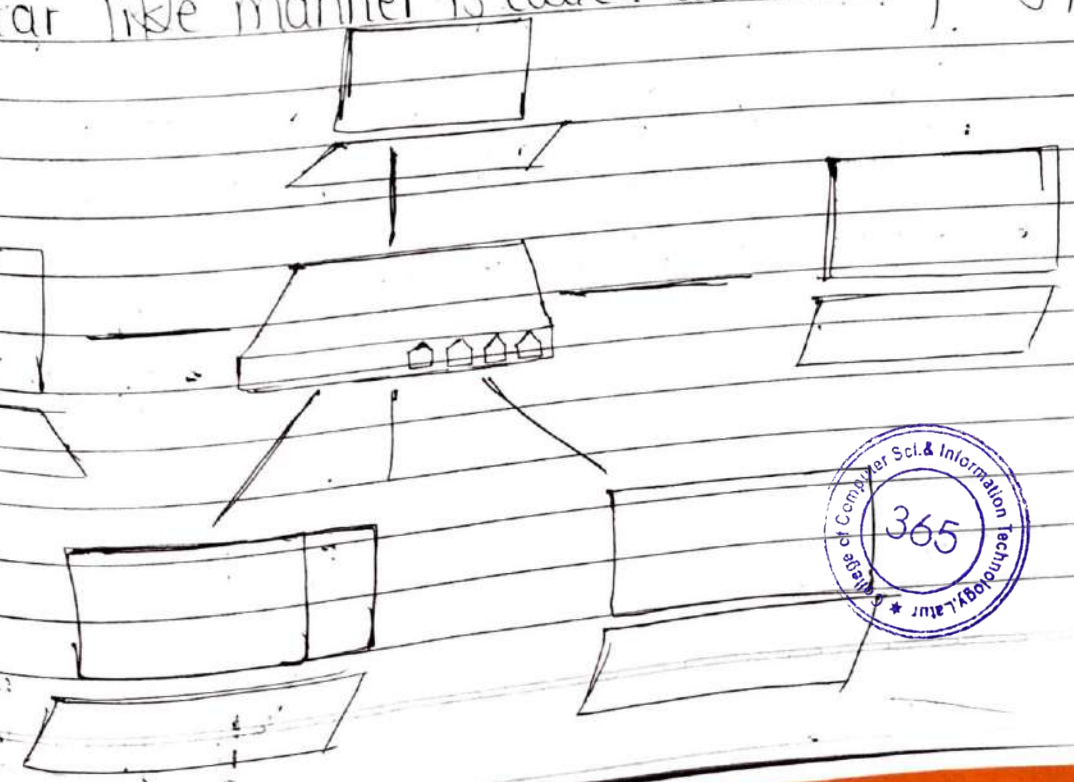

- Topology - Arrangement of computer system to form the network.

Bus Topology - The arrangement of computer in single line is called Bus Topology.

Star Topology
The arrangement of computers are connected to star like manner is called as star topology.

3) Ring topology

The arrangement of computer connected Ring like structure is called Ring Topology.

2) MAN

- MAN - is basically bigger version of LAN
- MAN create a group of nearby corporate offices or city might be either private or public.
- MAN is a network that interconnects users with computer resources, in a geographical area or region larger than that covered by even local area network.

3) WAN

- It stands for wide Area Network.
- WAN spans large geographical area often country or continent.
- It contains connection of LAN and MAN
- It is used as all around the world.
- Business as well as education and government entities use WAN to replay data to students, clients, buyers, and suppliers from various location across the world.

• diagram of Ring Topology
