Access Management

AAA provides the facility of authentication, authorization and auditing for college. It helps college in controlling the proper accesses of the students, teachers and staff. college administrator can create roles for the users, and assign the appropriate accesses to the roles. When a user logs in, system determines users identity, as well as what a user is authorized to access. Any user has access only to his own activities and reports as per his roles. System restricts unauthorized users to access the software ensuring total security.

» Create User Role

» Assign Role to User

» Access Control for Role

» Manage User Accesses
