

7.2 Best Practices

7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.

Response:

7.2 Best Practices

1. Title I: series of online workshop

2. Objective of the Practice

To keep the faculty updated with the recent trends in the concerned subjects with all necessary update is the sole motive of this series where the faculty members are guided by some skilled trainers. To make the students highly competent is the next motive of these series so that the students may excel in the varies examinations including university and competitive exams. To train the brain for advances learning is the overall intention of these series.

3. The Context

Most students and new faculty members are worried about their performance in daily teaching learning activities. Many times it happens that some complicated concepts of the students and even some teachers are not so well cleared during learning process. To overcome this problem and make highly competent is the aim behind it. Following are some of the online workshops conducted by us.

Sr no.	Name of the workshop	Resource person	date
1	One day online workshop on English for job Entrepreneurship	Mr. K.R. Jadhav	07/04/2020
2	Counselling sessions using what's app for S.Y. students	All trainers of TPC	20/03/20
3	one day online workshop on video content generation	Mr. D.R. Somwanshi	13/06/2020
4	One day online workshop on project development	Mr. A.H. Ban	18/07/20

	using C #.NET		
5	Series of 2 back to back online workshop on analysis and network technology	Mr. N.S Patil	01/08/2020

5. Evidence of Success

We have got grand success in this decisive step. We have decided to give at least three opportunities to the registered students to get placed in IT companies. In this year Wipro visited our campus 3 times to recruit students. We also provided opportunities to get placed in TCS open Ignite, Micro Degree and off campus drive. As a result of this practice 96 students could get placement. The ratio of placement is increasing every year due to this practice.

6. Problem Encountered and Resource required

Time management: The main hurdle is to find time to conduct training sessions with academic schedule. To overcome this problem, we decided to invest extra time to conduct training sessions in summer and winter vacations.

Skilled expertise: sometimes we have to hire highly experienced and updated faculties from IT companies to provide best guidance regarding current trends in IT companies and sometimes we get scarcity of it.

Title II :

1. Title of the Practice: online contest series

Our college has made available a good platform of learning on online mode. So many programmes are available on different learning platforms. We have started online contests programmes on where many experts from different faculties are providing enhanced learning in different branches of knowledge. Many students join this platform and get advantage of it. They mainly appear for the different types of online contests.

2. Objectives of the Practice:

1. To provide the college students the platform to develop their subject knowledge
2. To provide recent and updated knowledge in a specific branch of knowledge.
3. To upgrade students.
4. To help students get additional knowledge of their subjects.
5. To help students be ready with strong academic skills with extra knowledge.
6. To help them check their competencies gained so far.
7. To help them realize their learning outcomes.
8. To let them know their actual progress in different subjects.
9. To help them upgrade knowing their real understanding.

3. The Contest (Features / Challenging Issues):

This practice is mainly followed during the academic year. Some contests are of one hour and some are more than one/ two hours and vice versa. Depending on the time management, students apply for these contests and solve it.

4. The Practice:

Generally, in every one or two months, there are some contests planned on online mode for the students. Students apply for the contests and on the day and time of the contest, they are ready with the necessary equipment may be at home or in the college wherever they are suitable. There is assignment solving process where the learner has to provide responses which are checked and evaluated in issuing certificate. Every concept in the related subject / topic is well evaluated. Following are some of the contests that we conducted during the academic year 2020-21

Sr. no	Name of the contest	Organised by
1	Web technology contest	Dept. of Com. Sci.
2	C Contest	Dept. of Com. Sci.
3	JAVA project based contest	Dept. of Com. Sci.
4	English aptitude contest	TPC
5	Contest web beginners	Dept. of Com. Sci.

5. Evidence of Success:

Our many students applied for the same and got benefited by these contests. Many students registered for these contests and got benefited which added their knowledge. Some students completed these contests which helped them to appear in some of the best companies' interviews.

6. Problems encountered and resources required:

Inviting the participant in the early period of the completion was slightly tedious for the organizing members. Students would feel shy to participate. Gradually the interest of the students has got increased. We promoted the students to take part in such contests.
